

## Feeder report - cattle

Market information provided by MLA's National Livestock Reporting Service

### Eastern States

report date 02 Dec 2016

The eastern states feeder indicators continued to decline this week - with all categories finishing lower compared to the week prior. Domestic paddock lines slipped marginally, while those suitable to export followed a similar trend - as rates eased 2c/kg lwt in sections. In the physical market, fluctuating supply across the major regions resulted in most younger lines trending cheaper, while tighter availability of older sections saw medium weight grown steers average dearer.
