

## Detailed saleyard report - cattle

Market information provided by MLA's National Livestock Reporting Service

### Great Southern Saleyard

report date 24 Nov 2011

Yarding Change  $\frac{1723}{364}$

comparison date 17/11/2011

The larger yarding included reasonable supplies of heavy weight steers, limited numbers of heavy weight heifers with trade weight yearling and cows volumes remaining fair, while vealer supplies were larger.

There were larger numbers of heavy weight vealers penned with quality more mixed than the previous week. Feeder and restocker demand throughout the classes declined with lower values recorded. Trade weight yearling steers enjoyed more active demand from both the feeder and processor sectors after the weaker competition of the previous week, while heifers again recorded weaker overall demand.

Heavy weight steer quality improved and this improved a stronger local and export processor competition, while a good quality cow yarding continued to attract a strong processor competition.
