

Over the hooks report - cattle

Market information provided by MLA's National Livestock Reporting Service

New South Wales

report date 22 Jun 2012

All contributors left their rates unchanged as numbers increase following the public holiday last week. Processors though are waiting to see what affect a normal trading week will have on longer term supply. However there remains sufficient supply on hand to meet current demand. Quality has been fair to good with some processors looking to the northern areas to secure finished young cattle.
