

Over the hooks report - cattle

Market information provided by MLA's National Livestock Reporting Service

Queensland

report date 29 Jun 2012

The majority of contributors have eased rates as supply is still easily attainable. Quality grass fed cattle are still available with some yet to feel the effects of winter. Processors in the south may have a restricted trading week as light rain has halted transport for some producers across the south west.

Please note due to the addition of two contributors no trend is offered for both the northern southern quotes.
