

Feeder report - cattle

Market information provided by MLA's National Livestock Reporting Service

Eastern States

report date 27 Jul 2012

Rates have been mixed as some contributors lifted 10¢/kg due to the quality available with many areas feeling the effects of the winter weather particularly in NSW and Victoria. Some contributors though were 5¢/kg cheaper as they have plenty of suitable cattle available to them.

In physical markets prices were also mixed with no real trend apparent despite the increased throughput.
