

Over the hooks report - cattle

Market information provided by MLA's National Livestock Reporting Service

Queensland

report date 14 Jun 2013

Prices have remained relatively unchanged from contributors this week, as processors are reportedly booked with ample supply. Suitable lines are still attainable, with reports suggesting the market to improve in the next couple of months.

With some coastal rain across the state in places, and more on the way, this is likely to have an impact on condition, with quality still mixed across most categories.
