Victorian over-the-hook indicators declined across all categories this week, with some contributors lowering quotes as much as 10c/kg cwt. Major steer lines eased 2c, while an increase in throughput saw the medium weight (260-280kg, A-E muscle) cow indicator also decrease, averaging 390c/kg cwt week-on-week. Please note, the trend across cow categories is not included due to one contributor returning to quote.
