

Feeder report - cattle

Market information provided by MLA's National Livestock Reporting Service

Eastern States

report date 12 Dec 2014

Out of the paddock feeder prices trended dearer week-on-week, with some contributors up 10¢ and 20¢/kg on domestic and short fed lines as supplies become more difficult to find following decent rain down the east coast. Physical market prices also improved, with yearling steers, the bulk of throughput, mostly up 3¢ to 6¢/kg.

Please note: this will be the last report for 2014. Reports will recommence on the 12th January 2015.
