

Feeder report - cattle

Market information provided by MLA's National Livestock Reporting Service

Eastern States

report date 12 Jun 2015

Out of the paddock feeder prices were mostly steady week-on-week. While most contributors kept rates unchanged, waiting to see the impact on the market of impending rain across NSW and southern Queensland, some adjusted prices up and down. Angus steers continue to demand high premiums, with quotes amongst the export paddock categories out to 310¢/kg. The physical market sold to a mixed trend, with southern prices continuing to sell at a 20-25¢/kg premium to Queensland cattle.
