

Over the hooks report - cattle

Market information provided by MLA's National Livestock Reporting Service

Queensland

report date 22 Jan 2016

Queensland over-the-hook indicators were mixed, with the majority of quotes decreasing week-on-week, in what was the second report for the year. The medium weight (260-280kg, A-E muscle) cow and yearling steer (240-260kg, A-C muscle) indicators both eased, averaging 466 c and 514c/kg cwt, respectively. Please note, trends are not included due to some contributors still returning to quote.
