

Detailed saleyard report - cattle

Market information provided by MLA's National Livestock Reporting Service

Warwick

report date 20 Sep 2016

Yarding Change 445
-441

comparison date 13/09/2016

As with other centres this week rain reduced the penning by more than half the usual numbers. There was a good supply of crop and supplementary fed cattle as well as some plainer quality and condition lots yarded. The condition of the cattle varied with all buyers catered for. The usual buyers were in attendance however, the extras from the previous week were absent. The market was driven by the lack of supply with restockers, lot-feeders and processors competing strongly for all classes.

Increased restocker activity saw the light weight steers and heifers sell to a dearer trend, up to 10c/kg in places, but not a lot for the most part. Medium weight yearlings to feed saw quality related price drops in both the steers and heifers, on a reasonably firm market trend. Supplementary fed heavy yearlings to the trade sold to a dearer trend, with a lift in the quality.

Heavy grown steers including milk and 2 tooth lots averaged 8c to 10c/kg dearer, with most being supplementary fed, some accredited. The cow market was firm to dearer with the plainer condition cows seeing the better price improvement, the lack of supply being the major factor.
