

Feeder report - cattle

Market information provided by MLA's National Livestock Reporting Service

Eastern States

report date 18 Nov 2016

The eastern states feeder indicators continued to ease this week, with major categories lowering marginally. As supply levels continue to improve, most sections declined once again - with those in the physical market trending cheaper overall. Restocker buyers in some markets however continued to compete strongly throughout certain lines, keeping some indicators buoyant - reportedly. Please note, paddock sale trends are not included this week as a result of one contributor returning to quote.
