

Feeder report - cattle

Market information provided by MLA's National Livestock Reporting Service

Eastern States

report date 25 Nov 2016

The eastern states feeder indicators lowered across most major categories this week - with some lines the exception, remaining firm to marginally dearer. Short fed export categories continued to decline this week, while domestic steers and heifers remained somewhat subdued compared to the weeks prior.

Conditions in the physical market varied, with most major sections easing, however tighter supply in certain southern regions resulted in a marginally dearer trend in some categories - reportedly.
