

Over the hooks report - cattle

Market information provided by MLA's National Livestock Reporting Service

Queensland

report date

22 Jul 2011

Slaughter rates were firm across the board with all processors keeping grass rates firm. Cattle supply has been tight in the north and south, with producers not keen to offload cattle given the current market conditions. Export demand is still reduced, which has meant processors are not operating at full capacity.

No trend is quoted for 100 day grain fed Ox, as one processor resumed supplying rates.

MSA grain fed quotes have been included, but no trend is available.
