

Over the hooks report - cattle

Market information provided by MLA's National Livestock Reporting Service

Queensland

report date

15 Jun 2012

Patchy rain over parts of the state and a short trading week resulted in contributors in the south leaving their rates unchanged. In the north of the state a processor reduced their rates 5¢/kg cwt as they have enough cattle booked in for the coming week. A factor behind current rates has been the ongoing difficult trading conditions on the domestic and export markets.

Please note due to a regular contributor offering rates again there is no trend available for southern cattle.
