

## Over the hooks report - cattle

Market information provided by MLA's National Livestock Reporting Service

### Queensland

report date

22 Jun 2012

No change was realised to any category in the north or south of the state. The return to a full trading week has meant that cattle supply is readily available, as demand for product remains sluggish. Overall, quality has been varied with some cattle starting to show effects of the winter, while most of the better quality cattle in all areas generally have had access to supplementary feeding.
