

Over the hooks report - cattle

Market information provided by MLA's National Livestock Reporting Service

Queensland

report date 28 Sep 2012

Following on from the cheaper trend last week, all contributors have left their grassfed rates unchanged. Supply is flowing particularly from the western areas as temperatures warm up. Quality is fair to good although the top end quality lines are becoming harder to source in any great number. Demand is still impacting on rates, while the fluctuations to the A\$ is also not assisting export trading.

MSA and grainfed rates have also been left unchanged.
