

Bore Field Manager

Our client is a market leading company with strong growth plans over the coming years.

With the large Horticultural irrigation projects currently underway in Northern Australia, they seek an experienced Bore Field Manager to join their NT Operations team.

The following duties are applicable to the role:

- Management of a significant number of bores on multiple sites.
- Bore head installation, maintenance, trouble shooting and repair.
- Service of work vehicles and equipment.
- Maintenance of pumps systems and pumps.
- Involvement in irrigation management and planning process.
- Staff management.

Successful applicants will possess the following:

- Proven experience with bore and/or irrigation systems.
- Demonstrated mechanical/maintenance ability with relevance to role – trade certified is preferable.

- Positive track of record in staff management.
- Capability to work autonomously in remote areas.
- Ability to maintain records and adhere to company systems and protocols.
- Strategic decision making competency
- Strong OH&S mindset.

This position has scope and potential for growth within an industry leading company.

This role comes with an attractive salary package including housing allowance and vehicle.

Staff 360 specialises in the provision of quality personnel sourced both locally and overseas. For more than 25 years, we have supported Australia's agricultural and agribusiness sectors by supplying skilled and experienced workers from production through to management.
