

# Plant Manager

We are a new, Australian owned meat processing facility about to start operations in both Dandenong and Deniliquin NSW. Run by the former executives of the Tasman Meat Group, the business is a start-up business with revenues expected to be in excess \$200M within 2 years, employing over 400 staff. The Dandenong processing facility is currently undergoing a major transformation, and will be equipped with the latest state of the art facilities. Our facility will operate 6 days per week, and will process approximately 750 cattle per shift for export overseas.

## About the Position:

As part of this new exciting journey, we are looking for an experienced Plant Manager to oversee the running of this fully refurbished state of the art Beef Abattoir operations based at our Dandenong facility. The facility will operate 6 days per week, and will process approximately 750 cattle per shift for export overseas.

As a proven and experienced Plant Manager, your strong communication skills and business acumen will shine as you showcase your ability to work across several stakeholders, problem solve, report information/findings, develop recommendations, and implement process changes to improve performance whilst also planning for the future.

Your responsibilities will include the strategic planning and the execution of these plans to ensure maximum use of resources, control levels and accuracy of waste including being responsible for continuous improvement to ensure continue growth of the business and the site's long term progress.

## Demonstrated Background Required:

- Extensive Abattoir Plant Management experience with a meat processing facility
- Comprehensive knowledge of relevant legislation, business practices, processes and procedures as they relate to a meat processing facility
- Business acumen and financial management knowledge
- Proven experience managing operation costs and P&L
- Ability to develop, lead, coach and motivate and inspire a high performing team
- Negotiation and influencing skills
- Innovation and continuous improvement focused
- Strong communication skills
- Demonstrate and role model the leadership behaviour's in the interactions with the team and stakeholders

If you are a person who is passionate about Occupational Health and Safety and you meet the relevant criteria, then please apply now for this exciting opportunity by emailing your resume to [employment@amg.com.au](mailto:employment@amg.com.au)

***Only shortlisted candidates will be contacted***

## QA Officers (Boning or Slaughter)

We are a new, Australian owned meat processing facility about to start operations in both Dandenong and Deniliquin NSW. Run by the former executives of the Tasman Meat Group, the business is a start-up business with revenues expected to be in excess \$200M within 2 years, employing over 400 staff. The Dandenong processing facility is currently undergoing a major transformation, and will be equipped with the latest state of the art facilities. Our facility will operate 6 days per week, and will process approximately 750 cattle per shift for export overseas.

We are seeking suitably qualified and competent Quality Assurance Officers to form our Departmental team to support the processing operations. We require people with a real passion for Quality Assurance who can help drive the company culture.

### About the Position:

- Online checks to ensure products meet specification
- Identify and assist in the resolution of meat quality, hygiene and animal welfare issues
- Conducting internal audits
- Laboratory sample collection and analysis
- Continuously review the risk management strategy within the business to highlight potential risks
- Working on the processing floor of either the boning room or slaughter floor
- Ensure compliance and with HACCP, SOPs and Specification Control Documents

### About the Person:

- MUST have experience in the meat industry in a processing capacity (boner or slaughterer)
- Certificate III in Meat Processing (preferred but not essential)
- Previous supervisor/management experience
- Ability and confidence to approach all process employees
- High level communication and literacy skills
- Intermediate level computer skills
- Methodical and clear headed, particularly when under pressure
- Able to work both as part of a team and independently
- Be highly motivated and have initiative

If you are interested in applying for role and you meet the above criteria, please email your CV together with a covering letter to [employment@amg.com.au](mailto:employment@amg.com.au)

***Only shortlisted candidates will be contacted***

## OH& S Coordinator

- Dandenong Location, Full time Position
- Newly Refurbished State of the Art Facility
- Do You Have a Passion for Health and Safety

We are a new, Australian owned meat processing facility about to start operations in both Dandenong and Deniliquin NSW. Run by the former executives of the Tasman Meat Group, the business is a start-up business with revenues expected to be in excess \$200M within 2 years, employing over 400 staff.

The Dandenong processing facility is currently undergoing a major transformation, and will be equipped with the latest state of the art facilities. Our facility will operate 6 days per week, and will process approximately 750 cattle per shift for export overseas.

We are currently seeking a self-motivated and passionate OH&S professional to work at our beef processing plant in Dandenong. This role would also have some responsibility for our site in Deniliquin NSW, and as such there would be some occasional travel to Deniliquin.

As this is a start up business, and a new role, the successful applicant would be comfortable coming in and setting up all relevant OH&S Policies and Procedures and conducting on site Risk Assessments. The successful applicant would have gained relevant knowledge and experience working in a similar role and would ideally have a Diploma in OH&S or higher qualification in a relevant field.

Previous experience in the meat or food industry would be advantageous, although not essential. You must have a strong working knowledge of National and State OH&S legislation.

This role is an autonomous role, therefore you would need to be comfortable running your own show.

If you are a person who is passionate about Occupational Health and Safety and you meet the relevant criteria, then please apply now for this exciting opportunity.
