

# Trainee Slaughtermen & Boners

## Join the team and secure your future!

Our Tongala plant is processing large numbers of cattle and we need Trainee Boners & Slaughtermen.

Meat processing experience would be great but isn't essential. Suitable candidates without previous experience will receive full comprehensive training that is nationally accredited. It leads to a fully recognised meat processing trade qualification.

HW Greenham & Sons is a 100% Australian family owned business and the Tongala facility has been operating for almost 20 years.

Located near Echuca in northern Victoria, the region offers a wide range of water-based recreational and sporting opportunities. It is a paradise for fishing and boating enthusiasts and great for families.

Meat processing is strenuous work and requires physical fitness and strength. Applicants will have to undergo a medical examination, and drug and alcohol screening. The company offers excellent wages and conditions.

*Applicants who have previously applied for these positions do not have to reapply.*

*Applications can be obtained from our office or at [www.greenham.com.au](http://www.greenham.com.au)*
