

Beef Supply Chain Development and Operations Manager (WA based)

Get in on the ground floor of a dynamic new business
Cutting edge technical analysis of supply chain performance
Innovative developmental role across the entire WA beef supply chain

The position of Beef Supply Chain Development and Operations Manager reports directly to the Managing Director and demands a forward thinking individual capable of coordinating and planning backgrounding and lotfeeding operations across multiple sites throughout the south west of WA.

Experience in logistics and scheduling, together with great communication and people skills are essential. Additional to operations, this role will focus on supply chain development through building relationships and inspiring confidence in cattle production from producers, backgrounders, lotfeeders and transporters through to slaughter.

The successful candidate will :

- Have experience in supply chain development (not specifically in the beef industry)
- A passion for agriculture
- A passion for innovation
- Well-developed analytical skills
- Well-developed IT and reporting skills
- Ability to communicate with supply chain individuals and groups

This exciting position offers the opportunity to introduce genuine innovation leading to positive change within the Western Australian beef industry.
