

PLANT ENGINEER

- Friendly team environment
- Challenging and diverse role

Bindaree Beef is looking for a suitably experienced Plant Engineer to design, plan and oversee all aspects of preventive and reactive plant maintenance at our Inverell NSW meat processing plant.

To be successful you will have a proactive approach, ensuring sound safety and leadership practices are inbuilt whilst planning and executing projects.

Responsibilities:

- Plan, organise and control project and maintenance activities, optimising the use of available resources
- Apply good engineering standards and practices in all maintenance and project activities
- Oversee plant contractors and trades people
- Identify and implement continuous improvement initiatives in process, systems and equipment
- Manage repair and maintenance costs within budget limitations.

To fit into the team you will need:

- Previous Engineering experience, preferably mechanical and in a large manufacturing environment
- Time management skills and the ability to multi-task
- Highly developed communication, interpersonal and problem solving skills
- Excellent computer skills
- Sound knowledge of WHS and Environmental regulations

Bring your can-do attitude and make this role your own
