

Program Manager - Meat Industry R&D

This R&D organisation has an objective to develop and deliver strategic R&D outcomes that benefit the meat processing industry and the community as a whole, focusing its activities to maximise the efficiency, viability and sustainability of member businesses engaged in this sector. Sustainability in the industry relates to a multitude of influences that may be social, economic, infrastructure and environmental in nature.

Tasks:

The role is an important and challenging opportunity to run and be responsible for the management of the sustainability R&D programs. Your responsibility as R&D Program Manager will be to manage important R&D projects and to work with key stakeholders to develop and implement program strategies. This includes representing the program with industry, key stakeholders, Government and the broader community. Not limited to leading the overall program, this key position includes participation in steering committees and reference groups within industry and close collaboration with suppliers.

Requirements:

To suit this key role we need a driven and inspiring person who can manage significantly sized R&D projects. With great leadership and communication skills, as well as your ability to network, you can focus on desired outcomes.

At a minimum a degree in physical or agricultural related sciences is required for this position, preferably with qualifications and/or relevant experience in business development or business and project management.

Written applications giving details of your work experience, qualifications and background are required by February 5th, 2016. Please Apply Online at www.agri.com.au (preferred) or via the Seek job advertisement. For a confidential discussion on the role please phone Dr. Ray Johnson, Managing Director, Agricultural Appointments on 0419-012841 or email to ray@agri.com.au. Note that candidates must have the ability to live and work in Australia.
