

## Livestock Manager - Carpenter Beef

Carpenter Beef is a progressive, integrated agricultural organisation located at Cataby in the Central West region of Western Australia. This property operates an AQIS approved quarantine backgrounding and feedlot facility with over 10,000 head capacity, in conjunction with over 20,000 acres, predominantly used for backgrounding and breeding cattle.

The Livestock Manager's will be responsible for all aspects of cattle handling, animal health/welfare management, data recording, and inventory control with a hands-on management approach.

The position requires applicants to:

- Be capable of managing a team
- Be energetic, well presented, with an outstanding work ethic and excellent communications skills
- Have experience with livestock
- Be able to work weekends when required
- Have a strong attention to detail and sound record keeping
- Maintain and adhere to NFAS, AusMeat QA, OH&S Systems

The successful candidate must have a strong passion for the agricultural industry, with a willingness to learn, whilst being highly motivated with initiative and preparedness to accept responsibility to support the property manager. Tertiary qualification in Agricultural Science or related fields would be highly regarded.

An attractive remuneration package, including housing, will be negotiated with successful applicants on the basis of current skills, experience and potential.

Applications (including cover letter and CV) should be forwarded to -
