

# **Don't be surprised by the costs of BVDV (pestivirus)**

**BVDV is the second most costly disease\* to the Australian cattle producer. It is a 'silent' disease that affects herd health, reproduction and growth rates. It is important to detect, investigate and manage herd conditions.**

**Swans Veterinary Services provides a complete list of services to assist other veterinarians to work with their clients to cost effectively manage BVDV.**

**Watch the most recent webinar from Dr Enoch Bergman from Swans Vets at Beef Central  
(Video link <https://www.youtube.com/watch?v=mXZOraWnchl> )**

**Don't hesitate to contact Swans Vets for further options or to design a specific BVDV herd control program:**
