

## **Australian Cattle and Beef Holdings**

### **Station Boreman, Water Maintenance Handyman Iffley Station**

ACBH is part of the ACC group which is a fully integrated beef supply chain business supplying beef to the Australian domestic market. ACBH is proudly 100% Australian owned. We run extensive breeding and backgrounding operations for up to 120,000 head of cattle over 6 properties across Queensland.

The above position is available at Iffley Stations 175kms SW of Mackay.

Reporting to the Station Manager, the applicant is expected to possess a can-do approach to day-to-day station operations.

To be successful for this combined role we are seeking an individual with experience in:

- Pulling and fixing mono bore pumps and electrical submersible pumps
- Carrying out new water infrastructures and Water Development works
- Welding and fabrication activities
- Mechanical knowledge and the ability to fix and repair infrastructure/plant
- An understanding of Station activities
- Working in a team environment with good work ethics and communication skills
- Assisting with work associated with livestock (including cattle)

This is a good opportunity for someone looking to join and grow a career within a successful and well respected industry leader working with a dedicated and committed group of team-minded people.

We offer market competitive remuneration and conditions. Single shared accommodation as well as a 3 bedroom cottage is available. Unfortunately no pets allowed.

To apply please send your resume and cover letter through to
