

Project Manager

- **Agribusiness infrastructure & technology**
- **Significant capital expenditure program**
- **18 month contract**

S.Kidman & Co Ltd is one of Australia's largest beef producers with a herd of 171,000 cattle. The company has pastoral leases covering approximately 80,000 square kilometres in three states and the Northern Territory, producing grass-fed beef for export.

The company has always strived to find better ways to do business, and this tradition continues with new owners who are committed to upgrading the carrying capacity of the Kidman properties through a substantial capital expenditure program. A significant proportion of the improvements are concentrated on Helen Springs and Brunchilly Stations in the Northern Territory and the company now requires a Project Manager to facilitate this program on time and within budget. The project includes the installation and commissioning of fencing, bores, pipelines, tanks, dams and cattle yards incorporating state of the art technology.

The Project Manager will be responsible for developing the project management plan, managing contractors, material tenders and delivery, infrastructure recording, milestones and budget. Staff training at all levels will be a crucial aspect in the use and adoption of new technology, including hydraulic crushes, calf cradles, walk over weighing and automated drafting.

This significant role requires the following:

- 3+ years' experience in contract management, civil works or building station infrastructure
- Familiarity with station life, rural fencing, pipelines, water points and cattle yards
- Experience in managing multiple contractors
- Sound computer literacy, including the application of technology and software as management tools
- Proven capability in written reporting and analysis relating to large capital improvement projects
- Understanding of maintenance quality and legislative standards
- Knowledge and understanding of health and safety in relation to risk management and remote infrastructure projects
- Strong people skills with staff, suppliers and contractors, inclusive in engaging and bringing people along.

This is a really exciting project, as S.Kidman & Co implement leading edge technology and infrastructure where you can really have an impact. This will be an 18 month contract with the base location on Helen Springs Station with accommodation & food supplied.
