

Station Manager Vanrook Station, Gulf of Carpentaria, QLD

Located 140km north east of Normanton in the Gulf of Carpentaria, Vanrook is the principal breeding property of the Gulf Coast Agricultural Company. Carrying in excess of 60,000 head, with a large turnoff consisting of both external sales and internal transfers, this great opportunity requires extensive station management experience of large scale operations

Reporting directly to the Pastoral Inspector, the successful applicant will be responsible for delivering a structured turnoff and mustering program, utilising a combination of permanent mustering staff and multiple contract teams, to an agreed budget and timetable. The role will require a trustworthy individual who can demonstrate the following:

- Excellent horse and cattle handling skills, with a strong focus on *Low Stress Stock handling* techniques
- The highest standards of vehicle, equipment and machinery upkeep and maintenance
- Ensure station grounds and infrastructure are kept in immaculate condition at all times
- Proven communication and strong leadership traits
- Meticulous record keeping ability
- Willingness to learn new concepts, and adapt them to a team environment
- Strong Computer skills, especially in word & excel
- Commitment to a solid Workplace Health and Safety program
- Ability to work autonomously in a remote environment
- Show a keen desire to build a strong culture of education, staff retention, personal development and be a team player
- MC Truck License

Desirable but not essential:

- Helicopter/ Fixed wing Mustering Pilots license, or willingness to obtain one
- First Aid
- Chemical Certificate
- Knowledge of farming / irrigation

Very attractive salary package and conditions for the right applicant
