

Farm Manager SEQLD

About the Company

Located near Beaudesert, we are a family owned business with an active owner focused on international growth in its Wagyu cattle genetics and domestic breeding program. Our Wagyu herd is world recognised and is second to none in its pure breed line. Our breed has been successfully supplied to the domestic market throughout Australia with its full-blood bulls for the past 20 years, it is a proven and reliable high marbling breed.

About the Role

Recent growth in our Cattle Genetic & Breeding program has seen the need arise for a skilled Farm Manager to join and manage our small team of dedicated and enthusiastic employees. As the Farm Manager you will be hands on and accountable for the day-to-day running of the farm including everything from cropping, fencing, cattle work, marketing to cattle semen and embryos flushing and or insemination.

Skills and Experience

Your experience with the latest advances in genetic and genomic analysis together with concentrated breeding skills needs to be at a high level. You must possess an ability to lead and motivate your team to achieve a profitable and sustainable farm, whilst still maintain an active hands-on approach.

To be considered for this role you must fulfill the following:

- Solid business acumen fully conversant in farm accounting and relevant computer farm based programs.
- A strong work ethic, honest and dedicated to the cattle industry.
- A background in cattle breeding is essential, we are rapidly extending our genetic embryo and straw programs so a solid knowledge in this field also is non-negotiable.
- Must have good horsemanship skills, preferably with own horses and dogs.
- Display competent computer skills.
- Experience working with Wagyu or other high-end breeds in a similar role.
- Your ability to show initiative, generate ideas and lead a team will see you succeed in this role.

Key Responsibilities

- Accountable for managing and reporting on the crops, machinery and livestock operations of the entire property
- Livestock Procurement, Marketing and induction to the farm
- Oversee and management of cattle Feed, mixed ration implementation and Delivery
- Animal Husbandry including mustering, calving, weighing and care of all livestock
- Continued development of our Cattle Genetic & Breeding program, live cattle to semen and embryo's.

- Ultimate supervision of cropping and forage enterprises, productions, inventory and performance.
- Review, scheduling, delegation and management of servicing, repairs and maintenance to all Farm Machinery.
- Operational cost analysis and reduction of all expenditure.
- Budgets and Performance Recording against set KPI's.
- Staff supervision and Training.

Benefits and Rewards

With a rapidly expanding cattle genetics and breeding program, the successful individual will have the opportunity to contribute to the diversification and growth of the business and its team. For your commitment and abilities, you can expect to be rewarded with:

- Remuneration negotiation based on experience
- Bonus scheme based on profitability
- Modern 3 bedroom home with pool available
- Close to schools and shops
- Immediate start

This is a long-term appointment so stability and good references are a prerequisite. To find out more about this opportunity send your resume to admin@shamrockvalefarms.com
