

## **Livestock Feeding Manager**

### **The Company**

Our client is a national privately-owned food and agribusiness company, operating a diverse but related group of businesses throughout Australia, Europe, North America and Africa. One of these businesses is the largest beef feedlot in Victoria, offering custom feeding services to a range of domestic and Wagyu finishing clients. They are now seeking an experienced Livestock Feeding Manager/Supervisor to provide leadership and drive in the Mill / Feeding department.

### **The Role**

The role is to manage the feeding operations and staff in the production of a range of feed products for beef cattle. These custom feeding services are specifically designed to suit domestic, export and long feed requirements, and specialize in the famous Wagyu beef breed. The feeding programs are customized to any market specification. You will manage a range of commodities and their mixing to prepare appropriate feeds for the cattle. The role needs a "hands-on" manager who has experience at leading a team of people.

### **Duties**

This role will be responsible for the following key areas:

- The efficient and productive day-to-day running of the feeding operations and the preparation of accurate reports and forecasts
- Feeds and ration preparation, operating mixing plant, trucks, front-end loaders
- Supervision, management and leadership to the feeding operation
- Develop an environment of awareness for safety in the workplace and ensure that all Occupational Health and Safety policies and procedures are observed by all staff and contractors working in the feeding operations

### **Requirements to apply for this role**

You will need to have the following attributes to apply for this role:

- Strong background in livestock production
- Have experience in feedlot feeding methods or be prepared to learn on the job
- Knowledge of grain and roughage processing would be an advantage
- Well-developed planning skills
- A good leader with a hands-on approach
- Must really like working in an outdoor environment, fast-paced
- Be committed to ensuring a safe, healthy workplace and environment

**Location**

This role is located near Wangaratta in North-East Victoria.

**Remuneration**

A competitive remuneration package will be agreed based on skills and experience.

**To Apply**

Please apply online before the closing date of June 1<sup>st</sup>, 2018.
