- **Opportunity to invest in the business**

About Us

Delta Agribusiness is a leading force in independent rural services and the retail of agricultural inputs in Regional NSW and Southern QLD. With a strategic footprint comprising a network of 29 business locations from the Riverina in south, to the Southern QLD in the north, Delta Ag is a dynamic and diverse agribusiness, which employs over 200 people.

Delta Ag is owned and managed by the people that work within the business and is highly focused on the quality and culture of our people. At Delta, we know that in a highly competitive market place, it's the people that make the difference. With a culture of providing branches and staff with autonomy and empowerment, staff retention and stability is paramount. At Delta, we enjoy what we do, are passionate about customer service, the profitability of our clients, and the sustainability of agriculture at all levels.

The Role

We are seeking an individual who is passionate about agricultural production and rural lifestyle to take on the opportunity of Agronomist at our Temora and Ardlethan Branches. You will work closely with our management and branch team and become an integral member of a large and highly experienced wider agronomy team, consisting of over 40 experienced agronomists. You will require a commercial, flexible and positive attitude, as well as possessing a broad range of skills and knowledge of farm input products.

Our Temora and Ardlethan Branches works closely together along with our highly regarded Young, Wagga Wagga and Coolamon branches. The successful applicant will have demonstrated experience in winter crop advisory services.

The role will involve:

- Developing professional relationships with existing clients by providing advice on the full range of agri products and cutting edge agronomic advice to maximise crop and pasture production.
- Develop relationships with new clients by maximizing opportunities for the promotion of agronomic and consulting services along with other products and services across the Delta network.

- Help drive the adoption of new and evolving technologies including precision agriculture and sensor technology.
- Assist in the successful running and co-ordination of field days and farmer meetings with additional skill in writing technical and management articles where required.

To be successful in the role you will:

- You must have a relevant degree in agronomy or similar and must have a minimum of 2 years' experience in agronomy or related field.
- You must have a commitment to achieving team goals, commercial business outcomes, and highly developed interpersonal skills and dedication to customer service.
- Have the ability to work cohesively in a team environment.
- Genuine interest in both winter cereal cropping and mixed farming systems.
- Have a passion for driving whole farm performance through field-centric technology.
- Commitment to innovation and sustainable agronomic and farm management practices.

Your real strength will be your commitment to increase your client's profitability through superior service, continued learning and a willingness to challenge the status quo.

Delta Ag will provide a highly competitive remuneration package including incentives, as well as ongoing training and development and a long term career path, including the ability to invest in the business, and share in the value creation rewards of the broader business.
