

Embryo Transfer Donor Centre Overseer – FULL TIME

Holbrook Vet Centre (HVC) is seeking an enthusiastic team member to oversee our donor herd in Holbrook, southern NSW. This is an exciting opportunity for a highly motivated and organised individual and will involve a variety of work environments from field work to laboratory and office duties.

This full time position would suit a person who seeks to broaden their livestock and technical experience in the bovine artificial reproduction sector. You will be learning from industry leaders in a very unique and specialised field. HVC provides reproductive services to multiple seedstock producers from all over Australia and utilises high level reproductive technologies on a daily basis. Please refer to our website for more information regarding the HVC team and artificial breeding donor facility - <http://holbrookvetcentre.com.au/>.

The role will entail all tasks associated with managing the donor cows on centre. This will include the nutritional management as well as reproductive treatments and normal day to day farm activities. You would also be involved with assisting the veterinarian crush side with both embryo flushing and embryo transfer.

Undertaking this role will involve some weekend work, which is shared on a rotating roster. A good work ethic is essential, as you will be part of a team of highly motivated people who have exceptional professional standards.

The successful applicant will have a high attention to detail, cleanliness and professionalism and be prepared to work the cattle in a low stress manner. Basic computer skills are required, but training in all other aspects of the position will be provided. If this job sounds like you, please promptly email your cover letter and resume to caity@holbrookvetcentre.com.au
