

Maintenance Manager

Wodonga Abattoir is a large Meat Processing Facility based in Wodonga, Victoria. The Abattoir processes cattle, sheep, goat and lamb for overseas markets. We are seeking a Maintenance Manager. The position provides a great career opportunity to work within the Australian Red Meat Industry.

Duties would include:

- Management of a team of skilled trade personnel
- Management of maintenance and strategic engineering decisions
- Working within the Senior Management Team
- Assisting in the delivery of the planned preventative maintenance strategy to reduce reactive maintenance to a minimum
- Analysing inspection reports for faults and undertaking or recommending necessary repair and maintenance work
- An understanding of preparation of specifications, contracts and tender processes
- An understanding of principles of project management, scheduling and cost control techniques
- Efficiently deliver expectations of safety, reliability and compliance

Previous experience in the meat industry is not required but would be an advantage.

If you fit the criteria of this position then we invite you to apply, please apply online at www.wodongaabattoir.com.au/jobs by COB 8th March, 2019.
