

# Feedlot/Registered Live-export Quarantine Facility Manager Regional NSW

This is an exciting opportunity to join an established, feedlot operation located within 5km of Deniliquin in the Riverina southern NSW. The feedlot/quarantine facility has a capacity of 12,000 head, set up on self feeders, not a bunk system. The business is looking for a feedlot manager to manage the day to day operations of the feedlot, including staff.

Reporting to the overall operations manager of a well established Australian Livestock export business exporting over 100,000 cattle a year from southern Australia, you will be proven in managing people, have a high attention to detail, very competent livestock skills with a focus on animal welfare and safety. You will have experience working in a feedlot with a sound knowledge of cattle health/inductions and record keeping. The ideal candidate will be competent in Microsoft excel and inventory management and record keeping systems including the NLIS database. You will be enthusiastic with a professional, common sense approach and appreciate being part of a management team, playing an integral role in the backgrounding plus quarantining of shipments of livestock destined to contracts for the export business and also custom feeding for other large Australian domestic livestock businesses.

The feedlot is located within 5km of Deniliquin in a highly desirable Riverina location.

This role would suit a candidates with feedlot and/or strong on farm cattle experience looking to take on their first accountable management role.
