

BINDAREE BEEF GROUP

Business Analyst

- **Based – Inverell, Northwest NSW**
- **Challenging and Exciting Role**
- **Food Manufacturing Environment**

Located approximately 5kms from the regional town of Inverell, NSW, Australia, Bindaree Beef Group (BBG) is an integrated branded supply chain meat business delivering global meat solutions through a relentless focus on delivering in-full on-time with the highest quality assurance, and achieving complete alignment between producers and customers.

We currently have an opportunity within our Finance team for an enthusiastic and proactive Business Analyst. The successful candidate will report directly to the Planning and Analytics Manager and will provide detailed reporting, analytics and insights across the livestock and operational departments.

Your responsibilities will include but will not be limited to:

- Accurately providing analysis and reports about overall commercial, operational and financial performance;
- Seamlessly integrate with Livestock schedule to Production schedule through the value chain;
- Deliver clean, timely, reliable and robust data analysis to internal stakeholders;
- Synthesize raw data into digestible and actionable recommendations;
- Developing a suite of KPI's across the supply chain;
- Data analysis performance data including; cattle performance, slaughter yields, carcass performance;
- Coordinate Operational team; meeting agenda, minutes, information pack;
- Facilitate knowledge sharing across the Livestock and Production teams and the broader business;
- Innovate current data collection, storing and presentation process for reporting;
- Develop solutions to assist with achieving Bindaree Beef Group Strategy;
- Deliver business cases that are accurate, well documented and clearly presented;
- Collaborate with stakeholders to gain required information to support business management;
- Support overall business administration and commercial activities;
- Manage ongoing and ad hoc analytics as required.

Essential qualifications and additional requirements

- Tertiary qualifications in business or commerce, agricultural economics, agricultural science, animal science or associated disciplines, with a general understanding of agricultural systems preferred.
- The ability to organise, multi-task, prioritise and work under pressure is imperative, along with the ability to be resourceful and proactive in dealing with issues that may arise.
- Attention to detail and great time management skills.
- A strong solution and results driven focus with a strong ability to critically analyse data and make informed decisions based on that analysis.
- Highly developed verbal and written communication skills with the ability to professionally and proactively interact with internal and external stakeholders.
- High level of proficiency in Microsoft Office (Word, Excel & Outlook).
- Ability to work in a team environment being part of a cross functional integrated supply chain with team members and valued stakeholders.
