

Farm Operations Manager

Cunningham Cattle Company has an exciting opportunity for a fulltime experienced and highly motivated Farming Operations Manager to join our team at Goodar Station in southern Queensland. Reporting to the Property Manager, the candidate will be responsible for executing the farming activities of the Dry Land Broadacre cropping on the property of approximately 4,000 hectares.

The position will require a hands-on approach to manage the key operational farming activities including planting and harvesting and will include tractor driving and spraying along with the supervision of contractors and casual staff at peak operational times. This position will be responsible for farming operations record keeping and for maintaining plant and machinery. All activities will need to be carried out in a timely manner and to a high standard.

The suitable candidate for this role will have prior experience in performing and overseeing all aspects of broad acre cropping including chemical spraying and grain handling. They will be able to demonstrate sound machinery operations coupled with strong mechanical understanding and supervisory skills.

Remuneration will be negotiated with the successful candidate based on experience and qualifications. Excellent opportunity for career progression and exposure to industry leading practices and technology. Housing will be included within the remuneration package. Please apply for this position by emailing a cover letter and resume to careers@gunnagri.com.

Applications Close 25 March 2020.
