

General Manager East

Viridis Ag is a leading farming business dedicated to investing in, owning and operating broadacre row cropping farms across Australia. Our purpose is simple, we grow better crops for a better future, leveraging the latest technologies, diversity, our land, and great people to deliver sustainable returns.

At Viridis Ag, with the support of Macquarie Agricultural Funds Management, we have established a high performance team that is successfully running a national large-scale broad acre cropping business. We are looking for a GM East to lead the farming operations across NSW, Victoria, and Queensland.

Reporting to the CEO, you will be integral in driving a targeted acquisition program, as the business continues to grow and develop. Key to success will be your ability to develop and maintain a continuous improvement culture, where farming best practice and innovations are shared amongst our farms and the broader agricultural industry.

If you are a career farming professional with a proven track record in leading high performing operations teams and have a genuine passion for growing people and crops, then we want to hear from you.
