

Farm Manager and Assistant Farm Manager

THE ROLE

Our client operates a number of large properties in Western Australia, ranging from 4000 to 23,000 hectares of large-scale and highly productive broadacre cropping farms. Our client, a highly successful corporate agribusiness is seeking honest, self-motivated individuals to share the workload of managing and working the farm.

THE REQUIREMENTS

Reporting to Regional Managers, the successful applicant will have the following attributes:-

- Row crop irrigation experience with canola, lupins, wheat and grain crops;
- Broadacre farming experience with spray rigs, planters etc;
- Managerial experience in the field, including employees, budgeting, forecasting, irrigation;
- Self-motivated. Ability to manage self and other staff;
- Mechanically minded;
- Chemcert certificate and truck license (semi) preferred.

LOCATION AND REMUNERATION

Based in Western Australia. This is an excellent opportunity to progress your career and as such an attractive package will be negotiated including accommodation.
