

Farm Manager, Dairy Cattle

THE ROLE

Be part of the leadership team of one of Australia's largest milk producers with dairy properties across south-eastern Australia. An opportunity to join a family friendly culture that has strong commitment to safety, employee development and support, work-life balance, and animal welfare.

An experienced Dairy Farm Manager is required to run a 480 cow, spilt calving farm in the Victorian Western District area.

THE RESPONSIBILITIES

- Management of dairy herd including heifer rearing, milking, herd health, breeding and raising of replacements;
- Leadership – providing direction and development for the farm team;
- Implementation of business plans;
- Pasture management;
- Farm financial management – driving sustainable profitability.

THE REQUIREMENTS

- 5+ years of farm management experience;
- Academic qualifications in Agriculture and or Farm Management would be an advantage;
- Intensive rearing and pasture grazing management experience;
- Experienced in dairy milk production and handling;
- Farm asset and equipment maintenance;
- Budgeting and KPI achievement;
- Driving and implementing safety management systems;
- Ability to manage and mentor staff;
- Good work ethic and positive attitude.

LOCATION AND REMUNERATION

Based in the Victorian Western District area. A competitive remuneration package is on offer to the right candidate. Housing, vehicle, and other benefits included.
