- Oversee the running of daily plant operations including water, steam, refrigeration, hydraulics and pneumatics
- Ensure the service schedules for all equipment/machinery are met
- Provide service support to the production processes and daily running of the plant
- Respond to service requests of boiler and refrigeration in a timely manner
- Maintain positive relationships with suppliers and maintenance support contractors/companies
- Assist the Plant Engineer and Maintenance Manager with capital, engineering and environmental projects
- Assist the Engineer and Maintenance Manager to provide leadership and support to the management and staff as required
- Actively assist with implementing all company policies and procedures, safe work instructions to ensure compliance with legislative responsibilities
- Effectively communicate with the Maintenance Manager, Plant Engineers and General Manager

Ideally you have

- Computer skills
- Maintenance experience in the red meat industry
- Knowledge of relevant building and environmental regulations along with WH&S
- Three years of experience in refrigeration
- Advanced boiler ticket and relevant trade certificates (Boiler, Fitter & Refrigeration)

If this is an opportunity you believe suited to your experience, you enjoy working in a harmonious workplace with ever-changing challenges and where no two days are the same, we would love to hear from you.
