

Maintenance Manager

- Lifestyle location – Victorian & NSW Border
- Strong reputation on quality & product
- Engaged team, a culture of development

About the company

This major livestock processor has been a market frontrunner supplying quality products for over 50 years. Privately owned and located on the Victorian and NSW border, they deliver superior products to overseas and domestic markets. Built upon flexibility, innovation, staff training and development, they are well positioned to continue to meet global demand as this market segment continues to grow.

About the role

You will report to the General Manager and focus on the day-to-day operations of a fast-moving production facility. You will bring a proactive approach to the preventative maintenance program, ensuring the efficient running of the plant, minimising downtime while managing capital projects and the upgrading of equipment. You will also mentor a team of skilled and qualified staff, identifying, and implementing corrective actions, ensuring the highest standards of safety, quality and environmental controls are met.

Duties

- Bring a proactive approach to all planning, implementation & supervision of the maintenance program
- Monitor daily plant maintenance activities to ensure priorities are met, ensuring immediate reaction to breakdowns & urgent requirements, while ensuring quality of work is maintained
- Take an active role in understanding the root causes of downtime maintenance related AQIS & OH & S problems. Designing & implementing maintenance solutions to eliminate those causes
- Manage capital projects – initiation, design & cost estimation, preparation of submissions, implementation & cost monitoring & control through to completion
- Maintaining records which highlight corrective actions to resolve maintenance problems
- Liaising with supervisors, QA staff & controlling authority personnel on identified areas for improvement
- Ensure maintenance staff comply with the provision of the quality system as it relates to them
- Ensure all daily, weekly, monthly & yearly checks are completed as per the EMP & EP
- Collates historical data of the plant for the future benefit

Skills & experience

- A hands-on role that requires a trade qualified individual with experience in a time critical, fast-moving, high-volume food environment (meat processing will be highly regarded)
- Possessing strong management skills, you will bring a positive proactive customer service mindset to the maintenance team
- High level computer skills
- Demonstrable understanding of budgets & forecasts
- Sound knowledge of OH&S as it relates to this industry

Benefits

- Well established company with an engaged workforce
- Lifestyle environment – great climate and local environment – one of the fastest growing regions with all levels of schooling
- Become part of the senior leadership team with input into the future direction of the business
- Community-minded culture
