

## **Feedlot Manager – Finley, NSW**

**An exciting opportunity for a motivated professional who is ready to take the next step in their career and manage a new state of the art feedlot.**

Join a progressive company with a highly successful branded beef program.

Beefcorp Australia is a family owned vertically integrated Wagyu beef company established for over 30 years. We are seeking a manager for a new “state of the art” 8,000 head feedlot in the Southern Riverina with exceptional cattle welfare, environmental management and milling infrastructure. The property also incorporates irrigated cropping, silage production and grazing of backgrounders.

The ideal candidate will have experience in people management in a feedlot or intensive dairy and has a willingness to continue to learn.

We are seeking someone who will embrace our company culture of teamwork, care for our people, cattle and farms in producing high quality beef.

### **Job tasks and responsibilities**

The day to day running of a professional feedlot. This includes animal husbandry, feed milling and ration delivery, commodity management, maintenance, pen cleaning and compost management.

Ability to multitask and problem solve in a dynamic technical operation.

Maintain high levels of data recording and office management.

Ensure the feedlot, machinery, infrastructure and property are well maintained to a high standard.

Supervise staff, manage rosters and training to build a high performing team that work in a safe and productive manner.

Ensure the feedlot complies with NFAS and EPA licensing requirements.

Maintain the Feedlot Standard Operating procedures and ensure a high level of OHS.

Oversee the management of the cropping, silage and grazing programs.

### **Skills and experience**

A professional approach to the operation of a feedlot and farm with a high level of attention to detail and pride in your performance,

Knowledge and passion for high standards of animal welfare.

A strong work ethic, self-motivation and keenness to get the job done.

Willingness to learn and adapt to modern standards of land, energy and environmental management.

Good computer skills and the ability to be trained in using FY3000, Feedbunk, Digi-Star and StockalD.

Staff management experience and a good communicator.

Team player able to work with other company staff to ensure the feedlot integrates with other company operations.

Degree or equivalent qualification will be highly regarded.

It would be desirable if you have 5 years quality cattle experience including feedlot or intensive dairy.

Please include at least 3 referees and contact numbers with your application.

Applications will be treated with strict confidentiality.

### **Job benefits and perks**

A competitive package including excellent accommodation on the property and a vehicle will be provided.

Finley township is 15 minutes from the property.
