

CONSULTING AGRONOMIST

The Company

As a well-established agronomic consulting firm our client provides independent advice to farms throughout the Lachlan and Murrumbidgee valleys.

Their team is involved in providing management advice to irrigation and dryland clients, with activities including; agronomic advice to irrigated summer and winter dryland cropping, budgeting, strategic farm planning and farm management.

The Opportunity

A fresh position has become available for either an experienced crop consultant or a graduate agronomist to join the business in the Griffith/Hay/Hillston region of NSW.

With well embedded growers on their books, YOU will take over an already established client base and can become a partner in the business in the future.

The role involves providing whole farm agronomic advice focused on irrigated cotton and dryland cereals and pulses, as well as, an opportunity to provide input on improved pasture-based grazing systems.

So become truly recognised & paid what YOUR skills are worth.

The Requirements

- Tertiary Qualifications in an agriculturally based discipline;
- >2 years' experience in providing agronomic advice to farmers;
- Specific experience in cotton production;
- Ability to work independently, whilst enjoying a team environment;
- Excellent communication and computer-based skills.

Opportunities for Personal Development

- Exposure to a broad range of dryland and irrigated winter and summer crops, dealing with high quality farmers and being mentored by experienced professional consulting agronomists;
- Enrol in post graduate studies and many accreditation courses to develop technical skills in line with current best practice in all industries;
- Exposure to a wide range of industries with a requirement to develop new skills;
- Opportunities to develop skills in specialist areas and areas of interest.
