

We are a young, enthusiastic, motivated and growth driven couple looking for our next career opportunity!

We have experience in all general farm operations, large scale reproduction programs, trading livestock, feed lotting, pasture management, dryland/irrigated cropping, engineering, budgeting, bookkeeping, WHS, staff management and human resources. We can artificial inseminate and preg-test cattle, operate most machinery, plan and deliver capital work projects. Together there isn't much we can't do.

We are interested in moving to the Upper Hunter, Northern Tablelands, Mid North and North NSW coast regions.

If you would like more information, please don't hesitate to reach out.
