

Pardoo Wagyu is leading transformational change to produce purebred Wagyu beef for the local and international market.

We have an exciting opportunity available at our Wagyu Fullblood Stud and Genetics Centre just outside of Perth, WA that breeds and supplies our Pilbara & Kimberley commercial herds with high quality Wagyu bulls. The role is for a Cattle and Farm hand, someone passionate about cattle and the future of cattle breeding. Not only will you have a hands-on role in the farm, but you will be involved in AI & ET breeding programs in furthering the genetic gain in the stud herd.

In addition to learning the breeding program, you will also be heavily involved in the general day to day care and welfare of the cattle and the farm such as:-

- Feeding hay, lick running.
- Checking and maintaining water points, clean water troughs & pumping water.
- Assisting with Cattle work, drafting, programming cattle for AI & ET programs, calf marking, semen collection, bull semen testing, Freeze branding etc
- Cattle movements on the farm
- Basic Fence maintenance (fixing broken wires etc.).

Career development is available with the right person to be trained in this permanent role. The rewards are great, not only numerically but also in job satisfaction. We will supply a vehicle for on site use and the tools needed to carry out the duties.

Who are we looking for?

- Someone who has at least 4 years general farm work experience in Southern Agricultural cattle livestock operations;

The farm is located an easy 45 minutes from Midland, an hour from Perth, 35 minutes to York, 35 minutes to Toodyay and 25 minutes to Northam meaning that you have the best of it all with a rural feel, stunning surroundings and all of the necessary amenities in close range.

If this sounds like we are the company for you and you are the person for us, please apply with a cover letter outlining your experience and your required notice period to HR@pardoowagyu.com
