

Farm Manager

- If in-the-paddock hands-on sheep and cattle production is your passion, then this role will suit perfectly
- A key role in the management of two exceptionally well-know, and highly reliable properties
- Locations – Gundagai or Yass, NSW

About the role

With an emphasis on high quality livestock production the opportunity has arisen to take over the Farm Management of either one or two exceptional 'blue chip' properties in the Southern Tablelands, NSW. The combined holding is approx. 3,600 Ha, which is split almost 50/50 between the two sights of responsibility.

Responsibilities

The Farm Manager's primarily focus will be on the livestock production enterprises. Whilst farm maintenance and development will fall under your realm, the cropping and pasture management enterprises are run with the use on contractors at this point in time. An understanding of cropping and pasture systems and management will be highly regarded.

Education / Experience / Skills

- Extensive knowledge & experience in sheep & cattle operations
- Ability to identify, analyse & improve processes (esp. animal health)
- Strong work ethic & exceptional attention to detail
- Experience with reporting & Farm Management software (e.g. AgriWebb)
- Understanding of cropping and pasture systems and management
- Own working dogs (essential)
- Current driver's license, firearms license and Chemcert accreditation

Agribusiness Recruitment Pty Ltd thanks all applicants. However, only those to be interviewed will be contacted.
