

Procurement Manager

Our Client

Our client is a provider of agronomic services to the broadacre and irrigated cropping sectors, with several rural outlets in Queensland. They provide fertiliser and agricultural chemicals (herbicides, fungicides, and insecticides) to their client base, which is largely crop producers (cotton, chickpeas, mung beans, sorghum, etc.). They now wish to appoint a new Procurement Manager for the business.

Role

The Procurement Manager will be responsible for sourcing fertilisers and agricultural chemicals. These purchases will be made via direct accounts with the major chemical providers and also from the rural wholesalers. Your primary responsibility will be to develop and implement comprehensive procurement strategies that align with the business's long-term needs. This role would suit an Ag science graduate with a few years' work experience, training would be provided.

Responsibilities

- Lead the development of procurement and contracting strategy;
- Complete supplier due diligence and integration activities for spending requirements;
- Implement procurement and sourcing strategies that deliver value-for-money outcomes;
- Perform procurement reporting and analysis to identify potential value improvement opportunities;
- Maintain contractual and business relationships with vendors.

Requirements

- Demonstrated procurement experience in either the public sector or a corporate services environment;
- A background in agronomy, agricultural chemicals, or the fertiliser industry;
- Someone with prior knowledge of agricultural chemicals and/or fertiliser who is a self-starter, street smart, and has commercial acumen;
- Experience in forecasting requirements and budget preparation.

Location & Remuneration

This role would be based in Goondiwindi, Queensland. The remuneration package, which depends on skills and experience, includes salary, superannuation, car, and a bonus scheme.
