

# Site Supervisor (Grain Packing Facility)

A newly established Grain Commissioning Site in Western Australia is set to support the region's vital grain industry with modern infrastructure and efficient operations. As we gear up for our first season, we are looking for enthusiastic and reliable individuals to join our team.

This is an exciting opportunity to be part of a fresh, dynamic workplace that values safety, teamwork, and operational excellence across a range of seasonal and ongoing roles.

The role involves overseeing daily operations and ensuring the facility runs efficiently and safely, in collaboration with the Managing Director. Responsibilities include managing grain receipt, packing, and fumigation processes, maintaining high standards of grain quality, adhering to manufacturing and safety protocols, and overseeing site budgets. The role requires hands-on involvement in maintenance, staff coordination, training, and continuous improvement initiatives. It includes building strong relationships with growers and partners, ensuring regulatory compliance, and maintaining site hygiene. Training will be provided for becoming an Authorised Officer and licensed fumigator. The position also supports audits, risk assessments, and implements company policies and procedures.
