

Technical Agronomist – Broadacre, Horticulture and Pasture (SA)

- **Drive the commercial success of Ridley's fertiliser products**
- **Adelaide location | Competitive salary + bonus + benefits**
- **Help customers optimise fertiliser investment and achieve improved production outcomes**
- **Promote the growth of the Nutrient Advantage laboratory**

Who are we?

Ridley is Australia's leading provider of premium quality, high-performance nutrition solutions from soil to livestock, we understand smart, integrated approaches are pivotal to solving the food production challenges of today and tomorrow.

Our integrated capability and scale spans fertiliser expertise, production and sourcing of raw materials, ingredient recovery, specialised nutrition formulation, feed manufacturing and on-ground sales support.

We believe:

- The future of agriculture is an interconnected end-to-end ecosystem
- Progress happens through meaningful partnerships
- Nutrition is the key to sustainable and profitable farming

What is on offer?

We're looking for an experienced **Technical Agronomist** to work closely with customers and the Ridley sales team, to provide technical information and recommendations that enhance customer confidence in Ridley's fertiliser products (especially enhanced efficiency fertilisers, liquids and blends) and the Nutrient Advantage laboratory.

This is a unique opportunity to influence how agronomic knowledge is shared and applied - both internally and across the broader industry. You'll play a key role in strengthening capability, improving decision-making tools, and ensuring our agronomic advice remains practical, relevant and science based.

In this role, you will:

- Develop and maintain relationships with Customer Agronomists and Consultants.
- Grow sales of Ridley's differentiated product range (enhanced efficiency fertilisers, liquids and blends).
- Work with the Customers to demonstrate the value, purpose, and benefits of proprietary products.
- Grow Nutrient Advantage sample volume and revenue and increase the number of samples that receive a recommendation.
- Provide Agronomy in Practice training and ensure trainees they are using NA and NA Pro.
- Maintain and update Nutrient Advantage rules, logic and data tables.

- Generate and communicate to the business key insights and likely impact on fertiliser demand.

The key skills required for this role include:

- Degree in agriculture, agronomy, soil science or similar
- 5+ years' agronomy experience working with farmers in Australia.
- Expertise in fertiliser use, plant nutrition and soil science
- Experience in data analysis and interpretation
- Confident communicator with the ability to simplify complex concepts
- Strong stakeholder engagement skills and ability to influence
- Self-motivated, organised, and comfortable working both independently and collaboratively

What Ridley offers:

- Be part of a purpose-driven business supporting sustainable agriculture
- Influence how agronomic knowledge is applied across the industry
- Work in a collaborative, down-to-earth team
- Competitive salary, bonus program and employee benefits
- Opportunities for career growth within a national agribusiness

How to apply?

Click '**Apply Now**' and upload your resume and a short cover letter.

Open to applicants with unrestricted Australian work rights only. The successful candidate will also complete standard work-ready checks (including drug and alcohol testing).

We welcome applicants from all backgrounds. If you need any adjustments or support during the application process, please contact us at peopleteam@ridley.com.au. We are here to help.
