

Bulloo Downs Bore Runner Position

Position Purpose

The responsibility of the daily monitoring, maintenance, and operation of water infrastructure across the station. This role ensures livestock have continuous and reliable water supply by checking bores, tanks, troughs, pumps and pipelines. The position is critical to station operations as water security directly impacts cattle health, welfare and productivity

Key Responsibilities

- Water infrastructure checks
- Maintenance and repairs
- Record Keeping
- Livestock welfare support
- Station operations support
- Health, safety and environment

Team & Station Support

- Coordinate with station management
- Assist with other station duties if required

Skills & Attributes

- Practical mechanical knowledge
- Problem-solving ability
- Record keeping
- Livestock awareness
- Ability to work independently
- Vehicle and equipment operation
- Physical fitness
- Commitment to safety
- Communication skills

Working Conditions

- Remote location – live-in position with accommodation and meals provided
- Early starts, long days
- 5 day working week – Bore runner required to work around the watering requirements.
- Role requires working alone across remote areas
